

KRISHNA NANDAN JHA

Computer Science Undergraduate | Aspiring Full-Stack Developer

+91 70331 69536 | krishnaiha7033@gmail.com | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate targeting SDE internships, with hands-on experience across the MERN stack (React.js, Node.js, Express.js, MongoDB) plus PostgreSQL and REST API design. Built and shipped four full-stack applications, including an AI-integrated civic-issue platform (Google Gemini AI) and a social platform with OAuth 2.0 authentication. Comfortable across the stack: authentication systems, database schema design, geolocation/mapping integrations, and responsive UI. Currently strengthening Data Structures & Algorithms through daily problem solving on LeetCode.

TECHNICAL SKILLS

- Languages: C, C++ (OOP), Python, JavaScript
- Frontend: React.js, HTML5, CSS3, Bootstrap
- Backend: Node.js, Express.js, REST APIs, OAuth 2.0, EJS
- Databases: MongoDB, PostgreSQL, SQL
- Tools: Git, GitHub, VS Code, Google Gemini AI API, Leaflet/OpenStreetMap

PROJECT EXPERIENCE

Community Hero — AI-Powered Civic Issue Reporting Platform

Google AI Hackathon

Full-Stack Developer • Live Project

- Built a full-stack civic issue reporting platform (React.js, Node.js, Express.js, MongoDB) that lets citizens submit issues with images, descriptions, and precise location data.
- Integrated Google Gemini AI to auto-classify reported issues, predict severity, and route reports to the correct government department, plus a Gemini-powered chat assistant for civic queries.
- Designed role-based admin authorization across REST APIs for issue management, status updates, image uploads, and moderation.
- Added real-time geolocation tracking with Leaflet + OpenStreetMap, letting users visualize reported issues on an interactive map.

Pictura — Social Media Web Platform

Build with AI Agent Builder Camp

Full-Stack Developer • Live Project

- Built a full-stack social media application (React.js, Node.js, MongoDB) supporting user accounts, posts, and social interactions.
- Implemented OAuth 2.0 for secure third-party login and token-based session management, alongside custom auth and user profile flows.
- Designed and built REST APIs in Express.js for posts, profiles, and interactions, with MongoDB for persistence.

Disaster Management Website — Smart India Hackathon 2025

Team Project

Frontend Developer • Live Project

- Built a responsive platform to help authorities and citizens coordinate during disasters, including emergency contact directories and resource mapping.
- Implemented quick-access disaster guideline pages using semantic HTML/CSS; collaborated with a team to deliver a working prototype for SIH evaluation.

Nischay Partners & Associates — Client Website

Freelance Project

Frontend & Backend Developer • Live Project

- Delivered a responsive website for a CA and business compliance firm as a freelance client project, improving their online presence.
- Built CMS-like pages for non-technical content updates using Node.js/Express.js for routing and HTML/CSS/JS for the frontend.

EDUCATION

B.Tech in Computer Science

2025 – 2029

Jaypee University of Information Technology, Solan, Himachal Pradesh

Higher Secondary Education (12th)

Oriental Public School, Kishanganj, Bihar
